

Obstetric Triage/Admission for Confirmed COVID-19 Patient OR Person Under Investigation (PUI)

(Version: 04/02/2020)

SPECIAL DROPLET/CONTACT PRECAUTIONS
In addition to Standard Precautions
Only essential personnel should enter this room
If you have questions ask nursing staff

Everyone Must: including visitors, doctors & staff

- Clean hands when entering and leaving room
- Wear mask**
Fit tested N-95 or higher required when doing aerosolizing procedures
- Wear eye protection** (face shield or goggles)
- Gown and glove at door**
- KEEP DOOR CLOSED**
- Use patient dedicated or disposable equipment.** Clean and disinfect shared equipment.

PATIENT: Must be masked for her entire hospital stay. Can breastfeed but must wash hands prior to each feeding. May do skin to skin while breastfeeding. Should remain 6 ft apart from baby except when breastfeeding.

PATIENT'S SUPPORT PERSON: Must be masked at all times in hospital. Must stay with patient at all times (even during epidural placement). Cannot walk in and out of patient's room. Support person may do skin to skin. If he/she screens positive, the support person is not allowed into facility. An alternative support person may be considered on a case by case basis.

BABY: Unless breastfeeding, baby should remain 6 ft from mother at all times. Should remain in isolette unless breastfeeding or with partner. Isolette holes should remain open with proper ventilation.
